

Raihan Arif Styawan

Full Stack Engineer

PROFILE

I am a person who is fascinated by the world of web development. I have a strong commitment and passion in creating creative and innovative solutions to develop responsive, functional and engaging websites. I love collaborating with teams and constantly learning to improve my skills to face new challenges in web development. I am ready to explore career opportunities and make a positive contribution to the web development industry.

PROJECT EXPERIENCES

Full Stack Developer

Multi Warehouse E-Commerce | Des, 2022 - Feb, 2023

- Built a Homepage design from scratch using figma.
- Implementing database architecture, managing server-side logic, and integrating front-end interfaces with back-end functionality.
- Create a feature where users can update their personal data, such as address, password, photo, and email.
- Create a product list using sorting filtering pagination and product details.
- Create a feature for users to add products to their cart and update their products in the cart.
- Create a feature as an admin who can see all user orders, where the order will be processed.
- Create a feature as an admin can process user orders with a pessimistic locking system.
- Participating in code reviews, providing feedback and suggestions for improvements.
- Managing project timelines and priorities, and ensuring timely delivery of projects.
